

Hieu Phan

HBO-ICT Software Engineering Student

CONTACT

Github: github.com/hphantech

Email: hphan.tech@gmail.com

Address: Netherlands, Almere

Portfolio: portfolio-delta-one-26.vercel.app

- PROJECT EXPERIENCE

SquareAim — Football Planner Mobile App

Software Engineering Student (Comaker Project)

- Developed a mobile application for organizing football matches as part of a team-based software engineering project
 - Integrated REST APIs and implemented application logic
 - Gained experience working with real stakeholders and project requirements

Technologies: React Native, JavaScript, REST APIs

Digitalis — Interactive Learning Platform (Roblox)

Software Engineering Student (Comaker Project)

- Built an interactive learning experience for a primary school using Roblox
 - Implemented game logic, event handling, and user interaction systems
 - Worked in a team with iterative testing and feedback cycles
 - Translated educational requirements into functional game mechanics

Technologies: Luau, Roblox Studio

Other/Personal Projects

- Designed and built a personal portfolio website using React and Tailwind CSS
 - Built a movie discovery web application integrating the TMDB API for dynamic data rendering

Technologies: React, Tailwind CSS, Appwrite, REST APIs

EDUCATION

Windesheim University of Applied Sciences | 2023–Present

HBO-ICT – Software Engineering (Bachelor)

Mandatory Internship (HBO-ICT)

February 2, 2026 – June 26, 2026

- Duration: 21 weeks (~32 hours/week)
- Focus: Software Engineering / Web Development
- Part of HBO-ICT Software Engineering curriculum

TECHNICAL SKILLS	Frontend	Backend / APIs	Tools
	– HTML, CSS, JavaScript – React, Tailwind CSS, Next.js – React Native (basic)	– REST APIs – Node.js (basic) – MongoDB (basic) – Authentication concepts (basic)	– Git / GitHub – Postman – Figma – Linux (basic)
